

How to map a network drive

Overview

If you are switching from Pulse Secure VPN to Zscaler, you may need to remap your network drives. Follow the instructions below to guide you through how to map drives.

Instructions

After you have connected to the network via Zscaler, select the **Drive Mapping** icon on your desktop. If you do not see this icon on your desktop, you will need to manually map your drives.

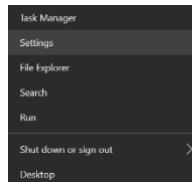

Manual drive mapping

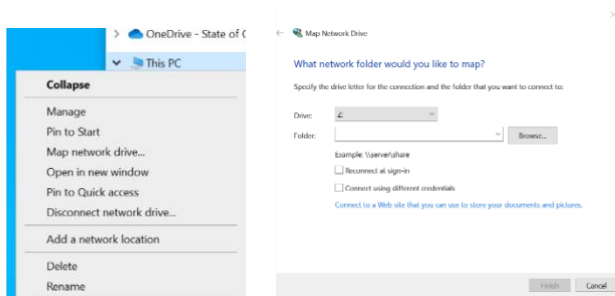

1. Right click on your windows **Start** button.

2. Select **File Explorer**.

3. Right-click on **This PC** and select **Map network drive**.

4. Below are some standard OMES mappings:
 - Drive H folder: \\agency.ok.local\data\5a_u2\Users\your user id
 - Drive I folder: <\\agency.ok.local\data\5A>
 - Drive J folder: \\agency.ok.local\data\5A_J
5. Select **Reconnect at sign-in**. Select **Finish**.

If you have issues remapping your drives, please contact the OMES Service Desk at 405-521-HELP or via our LIVE CHAT at [omes.ok.gov](https://www.ok.gov/omes).
